

The theory behind biophotonic therapy is based on the work of many health researchers and end users, but the more known works are by Dr. Franz Morell and has been expanded by the work of Doctors L.C. Vincent and F.A. Popp, who theorized that light can affect the electromagnetic oscillation, or waves of the body and regulate enzyme activity and so much more. The purpose of the BioPhoton LS 5.0 research modality is to improve energetic levels and physical health, while creating a true sense of wellness. To do this, change has to occur, meaning detoxification and cellular reordering due to today's environmental stresses and toxins. We highly recommend drinking plenty of good/living water. We recommend BeyondWater.org for all your "living" water needs.

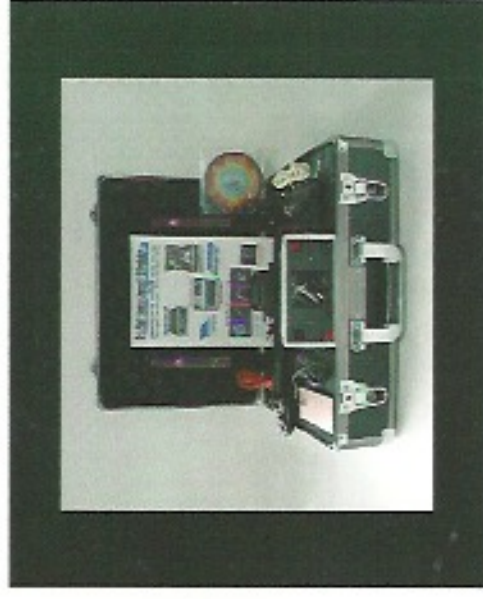

Potential Benefits

- **Open/move energetic fluids**
- **Stimulate & strengthen immune system**
- **Detoxification**
- **Devitalize mold, yeast, fungus, bacteria, viruses and parasites**
- **Reduce and eliminate pain**
- **Eliminate blockage and barrier issues**
- **Oxygenate cells with ozone**
- **Re-establish cells to their magnetic state**
- **Increase energy levels**

BioPhoton LS 5.0

*Lymphatic Stimulator for
Personal and Professional Use*

Full range of harmonic frequencies through plasma glass tubes and Radio-Wave Sound Probe attachment

Easy to use lymphatic stimulation and drainage modality, that provides safe ozone production and beneficial levels of ultra-violet and infrared-red light spectrums.
